

:> Overview

The results depicted here are based on the submissions from The Portuguese Abuse Open Feed - [@xSI_f33d](#) - during the first quarter, Q1, of 2020 in Portugal. This infographic includes an analysis of the phishing and malware campaigns that targeted Portuguese citizens.

:> Phishing and Malware Q1 2020

Figure 1: Volume of phishing and malware campaigns during Jan - Mar 2020 in Portugal.

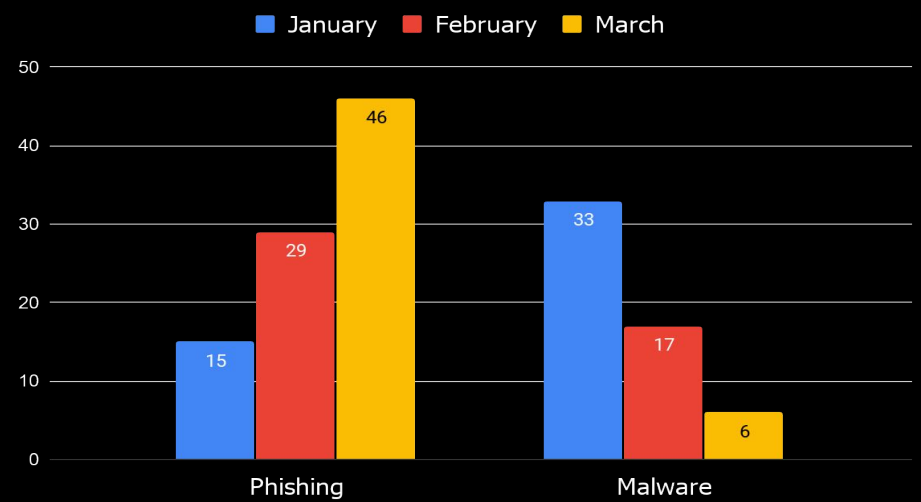

Figure 2: Phishing campaigns growing from January to March in contrast to malware with a significant decrease.

:> Malware by Numbers

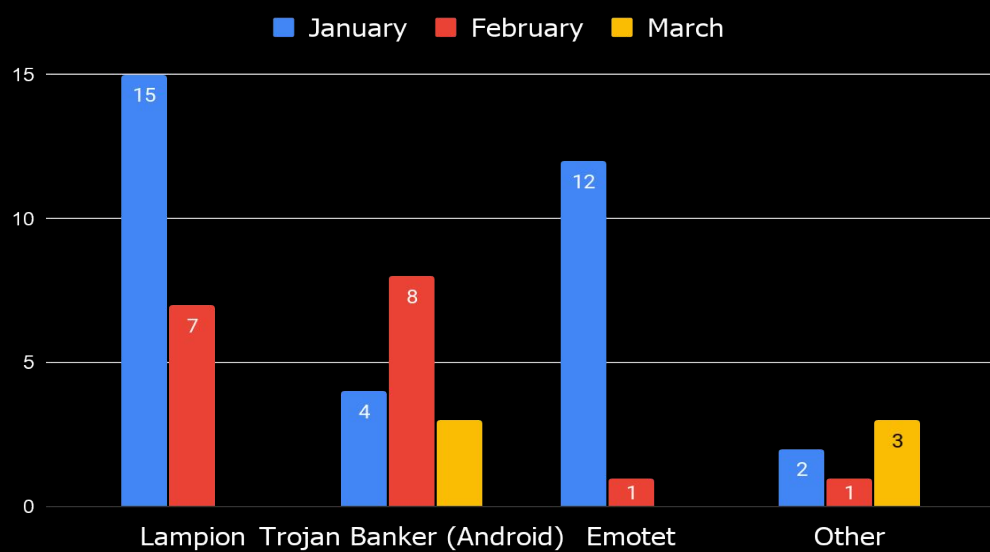

Figure 3: Number of malware campaigns by category, during Q1 2020 in Portugal.

Malware Campaigns

Figure 4: Comparison of overall malware campaigns used during Q1 2020 in Portugal.

:> Threats by Sector

Figure 5: Number of phishing and malware campaigns by sector during Q1 2020 in Portugal.

:> Final Thoughts

Through the results obtained it is possible to verify that there was a decrease in the number of malware incidents in contrast to an increase in cases of phishing over Q1 2020.

In terms of malware, the Lampion Trojan and the infamous Emotet were the most notable in the first three months.

Regarding the affected sectors, Banking was the most affected, followed by Financing (due to the Lampion trojan) and lastly by Retail.
