

:> Overview

The results depicted here are based on the submissions from The Portuguese Abuse Open Feed - [@xSI_f33d](#) - during the second quarter, Q2, of 2020 in Portugal. This infographic includes an analysis of the phishing and malware campaigns that targeted Portuguese citizens.

:> Phishing and Malware Q2 2020

Figure 1: Volume of phishing and malware campaigns (783) during Apr - Jun 2020 in Portugal.

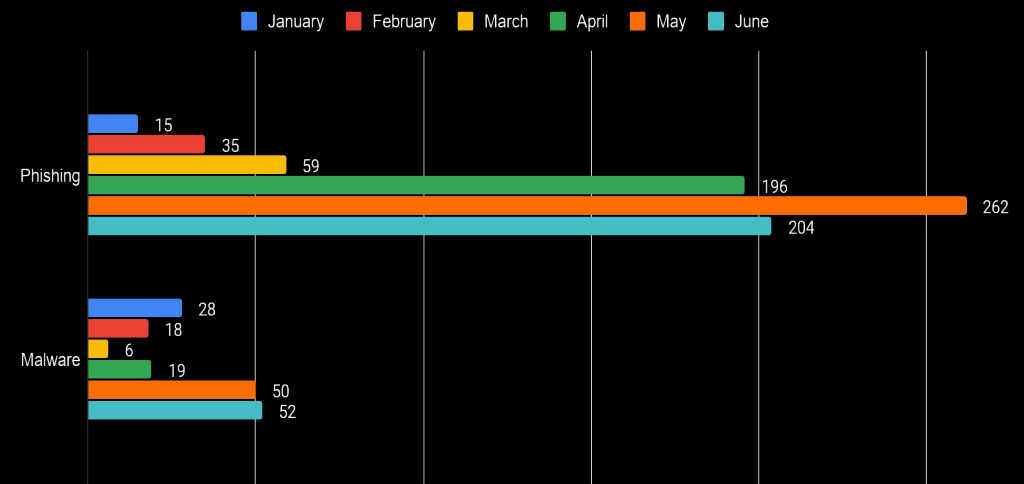

Figure 2: Phishing campaigns growing from Jan to Jun in contrast to malware with a significant decrease in Mar and increasing next months.

:> Malware by Numbers

Figure 3: Number of malware campaigns by category, during Q2 2020 in Portugal.

Malware Campaigns

Figure 4: Comparison of overall malware campaigns (121) disseminated during Q2 2020 in Portugal.

:> Threats by Sector

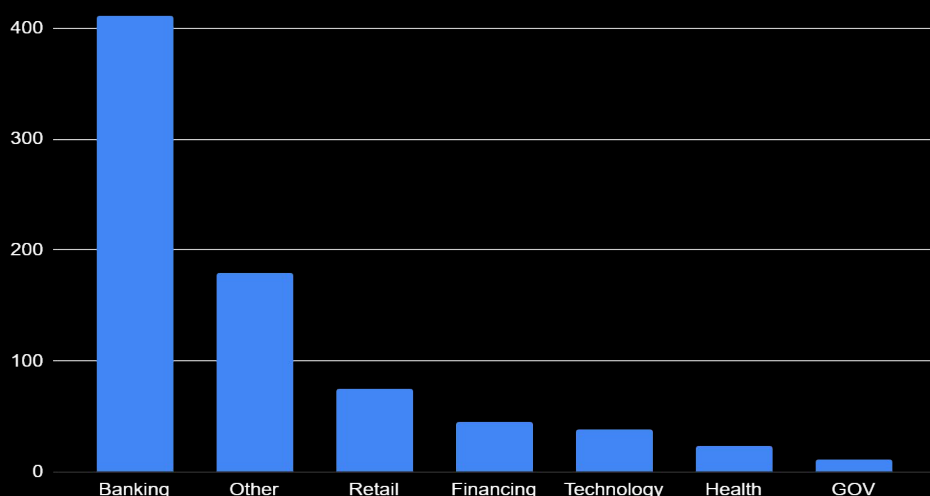

Figure 5: Number of phishing and malware campaigns by sector during Q2 2020 in Portugal.

:> Final Thoughts

Through the results obtained it is possible to verify that there was an increasing number of phishing campaigns in Q2 2020 in contrast to Q1 - an indicator related to the COVID-19 pandemic situation.

In terms of malware, *Satori/Mirai* botnet and the infamous *Lampion Trojan* were the most notable during Apr - Jun 2020.

Regarding the affected sectors, *Banking* was the most affected, followed by *Retail* and lastly by *Financing*.
