

### :> Overview

The results depicted here are based on the submissions from The Portuguese Abuse Open Feed - [@xSI\\_f33d](#) - during the first quarter, Q1, of 2021 in Portugal. This infographic includes an analysis of the phishing and malware campaigns that targeted Portuguese citizens.

### :> Phishing and Malware Q1 2021

Figure 1: Volume of phishing and malware submissions (327) during Jan - Mar 2021 in Portugal.

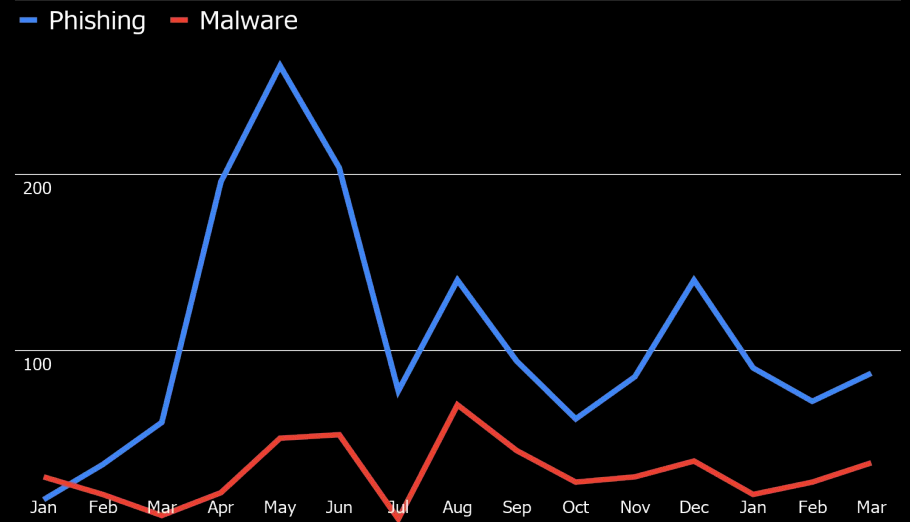

Figure 2: Number of phishing and malware campaigns from Jan 2020 to Mar 2021.

### :> Malware by Numbers

Figure 3: Number of malware submissions by category, during Q1 2021 in Portugal.

### Malware Campaigns

Figure 4: Comparison of overall malware samples (79) collected during Q1 2021 in Portugal.

### :> Threats by Sector

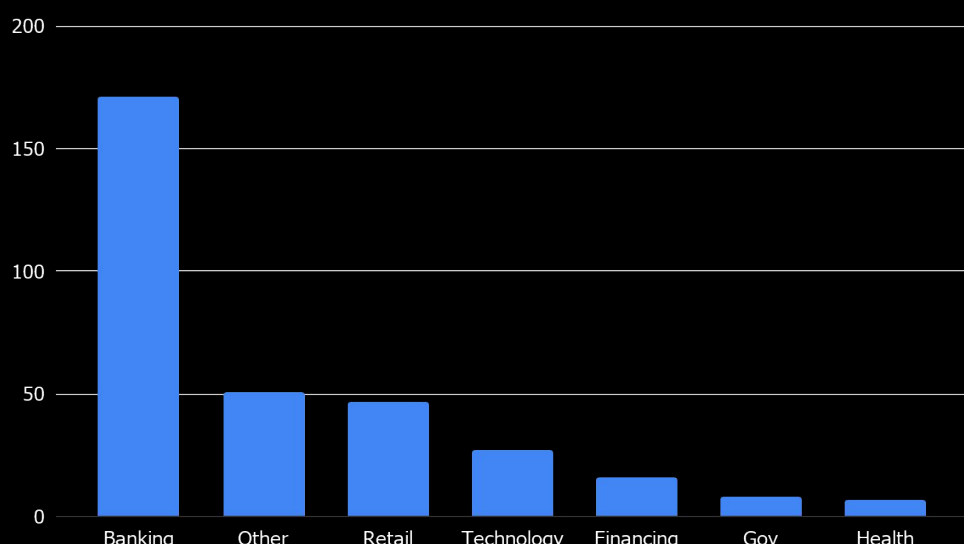

Figure 5: Number of phishing and malware campaigns by sector during Q1 2021 in Portugal.

### :> Final Thoughts

Through the results obtained it is possible to verify a reduction in terms of phishing in January 2021, but the trend is now increasing since mid-February 2021. Also, the red line highlighting the malware campaigns is increasing, probably related to the [Facebook data breach published](#) in early January.

In terms of malware, Satori/Mirai botnet, Office and VBA macros docs, and [Javali trojan banker](#) were the most active during Q1 2021.

Regarding the affected sectors, Banking was the most affected, followed by Retail and lastly by Technology.
