

### :> Overview

The results depicted here are based on the submissions from The Portuguese Abuse Open Feed - [@xSI\\_f33d](#) - during the second quarter, Q2, of 2021 in Portugal. This infographic includes an analysis of the phishing and malware campaigns that targeted Portuguese citizens.

### :> Phishing and Malware Q2 2021

Figure 1: Volume of phishing and malware submissions (308) during Apr - Jun 2021 in Portugal.

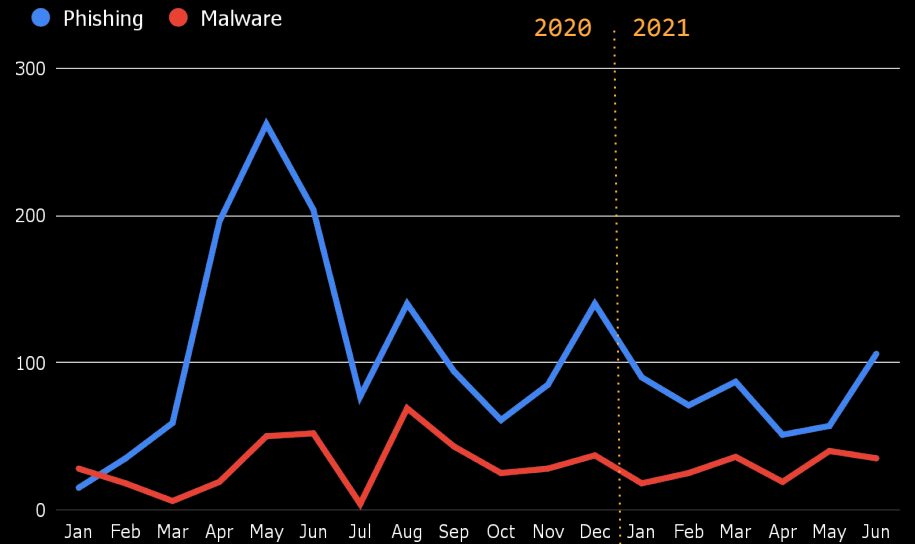

Figure 2: Number of phishing and malware campaigns from Jan 2020 to Jun 2021.

### :> Malware by Numbers

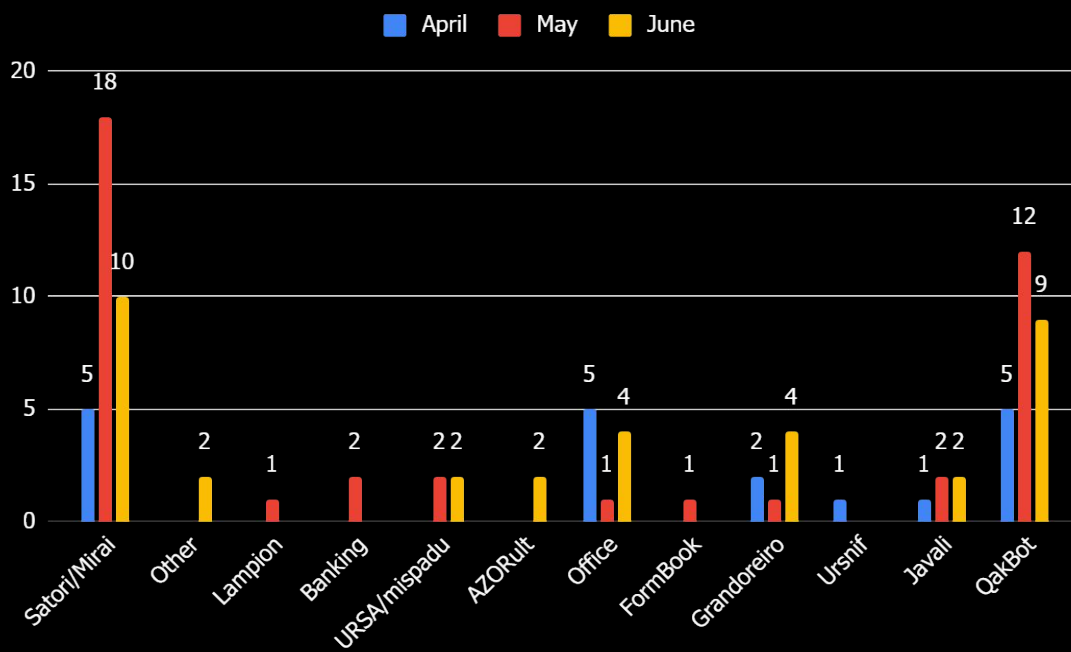

Figure 3: Number of malware submissions by category, during Q2 2021 in Portugal.

### Malware Campaigns

Figure 4: Comparison of overall malware samples (94) collected during Q2 2021 in Portugal.

### :> Threats by Sector

Figure 5: Number of phishing and malware campaigns by sector during Q2 2021 in Portugal.

### :> Final Thoughts

Through the results obtained it is possible to verify a reduction in terms of phishing since February 2021, but the trend is now increasing since mid-April 2021. Also, the red line highlighting the malware campaigns increased during May-Jun; a clear sign of the [QakBot](#) campaigns distributed during Q2 2021.

In terms of malware, Satori/Mirai botnet, [QakBot](#), and Office docs were the most active during Q2 2021.

Regarding the affected sectors, Banking was the most affected, followed by Retail and lastly by Technology.
